| Component | Description |
|---|---|
| ***Objectives*** | The goal is to ensure SauceDemos's core functionality (Login, Products Browsing, Sorting and Filtering, Cart managment and Checkout) performs as expected and meets performance, usability, and security standards.<br><br>Specific objectives include:<br>Verify flawless login and redirection flows<br>Validate UI responsiveness |
| ***Risk Management*** | Risk 1: SauceDemo website may become unavailable or unstable<br>during testing.<br>Risk 2: Slow application response may delay test execution and affect user experience.<br>Mitigation Strategies:<br>Verify website availability before testing sessions. Record outages, notify the team, and resume testing when the environment is available.<br>Measure response times for key actions, repeat measurements, document results, and report significant delays as defects when supported by evidence. |
| ***Approach*** | The test strategy combines manual and automated testing. Manual testing will be used to verify login, product browsing,sorting,shopping cart management,and checkout functionality.<br>Positive and negative testing techniques will be applied, and test results will be evaluated by comparing actual results with expected results. Defects will be documented and reported when failures occur.<br>Functional testing will be conducted to ensure that all features work according to the specified requirements and user stories.<br>Automated testing will handle regression and load tests. |
| ***Scope*** | in Scope:<br>User authentication<br>Product Browsing & Sorting<br>Shopping Cart Management<br>Checkout & Order<br><br>Out of Scope:<br>Real payment processing<br>Backend database |

| ***Test Deliverables*** | 1. Test Plan<br><br>- Format: PDF<br>- Frequency: Once during test planning (Oct 24 – Oct 29).<br>- Distribution: All QA team members.<br>- Description: Includes testing objectives, scope, approach, schedule, and responsibilities.<br><br>2. Test Cases<br><br>- Format: Excel / Jira<br>- Frequency: During test case design (Oct 30 – Nov 2).<br>- Distribution: QA Lead and Test Engineers.<br>- Description: Includes test steps, test data, and expected results for login, product browsing, sorting, cart management, and checkout.<br><br>3. Test Execution Results<br><br>- Format: Excel / Jira<br>- Frequency: Daily during functional testing (Nov 3 – Nov 5).<br>- Distribution: QA Lead and QA Team.<br>- Description: Records actual results and test case status (Pass/Fail).<br><br>4. Bug Reports<br><br>- Format: Jira<br>- Frequency: Whenever a defect is found.<br>- Distribution: QA Lead and Test Engineers.<br>- Description: Includes bug description, steps to reproduce, expected and actual results, severity, and screenshots when available. |
